Background

InfraGard is an information sharing organization dedicated to the protection of our nation’s critical infrastructure. InfraGard is an association of businesses, academic institutions, state and local law enforcement agencies, and other participants committed to sharing information and intelligence.

“As a campus public safety administrator, InfraGard is my one stop daily source for the most accurate and timely information on domestic and international threats.” - Raymond H. Thower, Jr., Director of Safety and Security, Gustavus Adolphus College

InfraGard chapters are geographically linked to FBI Field Office territories and each has an FBI Special Agent Coordinator assigned to it. The FBI and DHS work together to provide relevant information to InfraGard members.

Mission

The mission of InfraGard is to improve and extend information sharing between the private sector and the government, particularly the FBI, in order to better protect critical infrastructure. This is accomplished through ongoing dialog and timely communication between InfraGard members and the FBI.

83 of the top 100 firms in the Fortune 500 have an InfraGard representative

Why Join

“InfraGard gives those of us responsible for campus safety an opportunity to receive the most accurate information on foreign and domestic threats in a timely manner. It’s an important tool we rely on to ensure the safety of our communities. Knowledge is power and InfraGard is the key.” - Dr. Gary Margolis, Chief of Police, University of Vermont

InfraGard members gain access to information that can supplement their planning and operations for asset protection. In turn, information and expertise provided by InfraGard members assists the FBI in meeting its responsibilities to prevent terrorism and address the challenges associated with crime prevention and control.

Members receive access to:

- A members only secure InfraGard website
- FBI/DHS threat advisories, alerts and warnings
- Local meetings, training and education initiatives
- Online discussion groups and email listservs

Additional access is available to Special Interest Groups (SIG); of particular interest to campus public safety agencies is the Research and Technology Protection SIG (RTP-SIG). This special access portion of the InfraGard secure site provides actionable and relevant information on how academic institutions, private industry and cleared defense contractors can better protect their research and technology.
