**It’s on the Web**

A new member of the EDUCAUSE team, I had all the usual questions about the systems, office procedures, publication style, corporate history, programs we offered, and industry background—not to mention what the alphabet soup of acronyms meant. My coworkers, who patiently participated in my orientation, often referred me to the Web at the end of any particular explanation. “It’s on the Web. You can read more about it there,” they’d say.

It’s true that EDUCAUSE’s intranet is a very useful tool for any employee—once they know what’s out there. And the intranet is part of the larger EDUCAUSE Web site (see www.educause.edu) that has so much to offer its members—and new employees. If you haven’t visited in a while, I encourage you to do so.

Not only can you get information or register for conferences, seminars, and institutes offered through or by EDUCAUSE, you can also check job postings throughout our network of member campuses, read about various current issues, brush up on policy initiatives, or update your record in our database. You can order EDUCAUSE books and periodicals, join discussion groups, or get news and information about various programs such as the National Learning Infrastructure Initiative (NLII) and Net@EDU.

There are also guidelines for contributors at www.educause.edu/pub/eq/eq.html. I encourage you to contact me (dnishek@educause.edu) with feedback about EQ, if you have article ideas, or if you’d like to write for the journal. EQ is for members, by members, so if you have a successful practice to describe (or a not-so-successful one that was a valuable learning experience), a book to recommend, or just an idea you think should be explored in these pages, please let me know. Your contributions enrich our print and online community.

Dena Nishek
EQ Editor

**Prepared for Your Campus for E-Business**

by Alan Kantor, John Mattioli, and Michael Russo, PrinewaterhouseCoopers

Are you ready for the new frontier of e-business? Whether you’re considering an e-commerce application, Web-enabled student services, or distance education, your institution will benefit from carefully analyzing all aspects of this new venture.

---

**Transforming Student Services**

by Robert B. Knauft and Michael N. Haddad, University of Minnesota

By taking student services beyond records and financial aid, this office can play a key role in an institution’s academic and financial strategic planning. Plus, with customer service online, both staff and students can be better served.

---

**From Static Web Site to Portal**

by Christopher G. Connelly, Villanova University

Is everyone on your campus screaming for a portal? If so, take a look at how one university overhauled their static site into a dynamic and individualized Web system.

---

**Support for Online Teaching and Learning**

by Barbara Truran-Davis, Linda Fetch, Kathryn Thompson, and Francyscia Yonobu, University of Central Florida

This university has created an award-winning faculty development program for building online courses and giving learners the tools they need. Before you can implement a program like this, four key areas will have to be ready: the instruction, faculty, courses, and learners.

---

**Keeping the Pace in a Changing Environment**

by Sharron Bagheri

The University of British Columbia is using technology creatively to stay on the cutting edge.
