Student Information Technology Use and Skills in Higher Education: 2005 Survey Questionnaire

Thank you for your willingness to answer this survey, which focuses on your experiences with and opinions about information technology. The information you and other undergraduate students provide will be reported in a national study that will be available to higher education institutions. We will also make available to your school’s leaders data that you and your classmates give us about your school. The primary goal of the study is to better understand student experiences with information technology, which, in turn, can help your school’s leadership to respond to your IT needs.

Your answers are confidential, and neither your school nor the EDUCAUSE Center for Applied Research will be able to identify you.

For the purposes of this survey, information technology refers to “personal electronic devices such as laptops and handheld computers, cell phones, and your institution’s computers and associated devices.”

Please submit your survey responses as soon as possible within the next two weeks. It should take you approximately 15 minutes to complete the survey. If permitted by your state law, each participant who provides an e-mail address may be entered in a drawing for one of a hundred $50 gift certificates.

We appreciate your time and participation. If you have any questions or concerns, please contact the campus representative specified in the e-mail you were sent.

Section 1. About You

We may only survey students age 18 or older.

1.1 I am 18 years old or older. [Required] <If no, go to end of questionnaire. If yes, go to 1.2>
   ○ No
   ○ Yes
I give my consent to the following.
For this survey you were selected at random from a list of freshmen and seniors at your institution. We ask that you read this form and ask any questions you may have before agreeing to be in the study.
Sponsored by the EDUCAUSE Center for Applied Research, this study is being conducted by Dr. Robert Kvavik of the University of Minnesota and Judy Caruso of the University of Wisconsin–Madison.

Background Information
If you agree to be in this study, please complete and submit the following survey. The survey asks for basic background information and questions you about:
◆ What kinds of information technologies you use and how often.
◆ What your level of skill is at using different information technologies.
◆ How these technologies contribute to your undergraduate experience.
◆ What value information technologies provide in teaching and learning in higher education.
It will take about 15 minutes to complete the survey. Please answer the questions to the best of your ability. There is no right or wrong answer. You only need to fill out the survey once.

Risks and Benefits of Being in the Study
There are no physical, psychological, social, or medical risks associated with your participation in this study. The benefit of your participation is to inform school officials of the benefits of their technology investments for students.

Compensation
We will hold a raffle for gift certificates of $50 from Amazon.com for participating in this survey. If you choose to participate in the raffle, you must include an e-mail address in the space provided at the beginning of the survey. Once the survey has closed, we will conduct a random drawing from the e-mail addresses of all those who participated within two weeks of the closing of the survey, where permitted by state law. Based upon last year’s response rate, your chance of winning is estimated to be approximately 1 in 168.

Your e-mail address will be kept separately from the data collected in the survey. It will not be used to connect your survey responses with your name, nor will it be used for any purpose other than to contact you should you win the prize.

Confidentiality
The records of this study will be kept private. In any report we might publish, we will not include any information that will make it possible to identify a subject. Research records will be stored securely, and only researchers will have access to the records.

Voluntary Nature of the Study
Participation in this study is voluntary. Your decision whether to participate will not affect your current or future relations with your institution, with any of the institutions participating in this survey, or with EDUCAUSE. If you decide to participate, you are free not to answer any non-required question or withdraw at any time without affecting those relationships.
