Acknowledgments

Technology Everywhere
A Campus Agenda for Educating and Managing Workers in the Digital Age

Brian L. Hawkins, Julia A. Rudy, and William H. Wallace, Jr., Editors

A Publication of EDUCAUSE
First and foremost, we would like to thank the authors who contributed their time and expertise to the development of this book. We appreciate their willingness to help us deliver their research summaries, insights, and lessons learned to inform a "people" agenda for college and university leaders in an increasingly digital future.

The creation and delivery of volumes in the EDUCAUSE Leadership Strategies series reflect the commitment of the EDUCAUSE board of directors and members to advancing higher education by promoting the intelligent use of information technology (IT). Such use depends greatly on development and management of the IT workers and IT-fluent workers who are critical to supporting the new technologies and the innovative strategies they enable for the higher education enterprise—thus the decision to focus this sixth volume on IT-related people challenges.

We also wish to express our appreciation to the dedicated group of IT professionals, human resource professionals, and business officers who three years ago identified and discussed major HR challenges related to IT on college and university campuses. Their work, which was part of an effort sponsored by EDUCAUSE in cooperation with CUPA-HR (College and University Professional Association for Human Resources) and NACUBO (National Association of College and University Business Officers), laid the foundation for our further exploration of such challenges in this book.
Finally, we thank PricewaterhouseCoopers for their generous sponsorship of the EDUCAUSE Leadership Strategies series, which ensures the distribution of each volume to more than 1,800 EDUCAUSE representatives at member campuses, organizations, and corporations.
