How Mediasite Works

Record
- Automatically capture and synchronize video and slides
- Record any device - laptop, tablet, whiteboard, document camera, visualizer
- No slide uploads or post-production
- Pre-schedule to automatically start/stop recording
- Integrate with existing AV and room control systems
- Room-based and portable appliances

Deliver
- Stream live and on-demand to PC, Mac® and Linux®
- Create portable content – podcasts (MP3), vodcasts (MP4), DVD/CD, USB
- Auto-publish to Mediasite catalog, CMS/LMS, portal
- Embed presentations in any website or blog
- No transcoding or post-production delays

Watch
- High resolution video and slides
- User-controlled navigation and layout
- Custom branding
- Keyword search
- Interactive polls and Q&A
- Closed captioning support

Manage
- Brand and customize players
- Organize content in searchable catalogs
- Analyze all viewing data and trends
- Secure viewing and system access
- Create recording schedules
- Scale enterprise-wide
- On-premise or hosted offerings

RECORDING YOUR WEBCASTS

EASY TO USE
No need for presenters to pre-upload slides, install any software, change how they present or learn new technology

HANDS-FREE OPERATION
Automatically start/stop recording based on pre-scheduled times

LIVE AND ON-DEMAND
Record and stream presentations for viewers to watch now, later or both

DEVICE FLEXIBILITY
Record content presented from any DVI or VGA device (laptop, tablet PC, whiteboard, document camera, visualizer)

INSTANT RICH MEDIA
Automatically synchronized video and high resolution images eliminates post-production or transcoding delays

PAUSE/RESUME ANYTIME
Easily accommodate breaks or other unwanted content during any live or on-demand recording

MEDIASITE ML RECORDER
For your on-the-go webcasting, live events, guest speakers, conferences or tradeshows

MEDIASITE RL RECORDER
In your lecture halls, smart classrooms, conference and training rooms or auditoriums
MANAGING YOUR WEBCASTS

CUSTOMIZE
Create unique Mediasite Players with branding, polls, Q&A, closed captions and more.

CATALOG
Automatically publish recorded presentations to online catalogs for immediate viewing. Creating customized catalogs requires no web development or integration skills.

SCHEDULE
Save time by using existing course or room schedules to automate Mediasite recording and publishing.

SECURE
Leverage current directory systems to guarantee content and intellectual property remain secure.

ANALYZE
See who is watching what content, when and generate reports to analyze viewing patterns and trends.

INTEGRATE
Incorporate Mediasite presentations and catalogs into your CMS/LMS, content management system, blog or portal.

mediasite®
by sonicfoundry®
Mediasite is a complete rich media webcasting and publishing system that automates the capture, management and delivery of interactive multimedia presentations.

The Mediasite Recorder is a purpose-built rich media recording appliance designed with your presenters in mind. With built-in automation, video and visual content are immediately captured, synchronized and converted into high quality multimedia presentations – requiring no content uploads, post-production or training. Recorders are designed to capture any in-room presentation, remote event or video conference.

Mediasite EX Server provides every management tool you need to schedule, customize, catalog, secure, monitor and integrate your webcasts. It brings order to your content library by managing any level of recorded content hours, viewers and system users. Plus, it’s built to reliably scale across any organization – whether installed on-premise or as a hosted service.
